process more than

500 million bushels of corn
each year

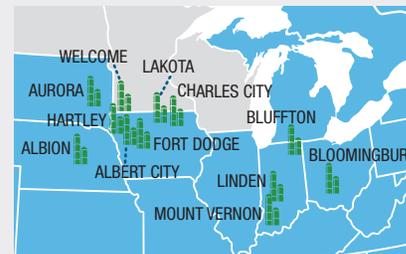

into **1.6 billion gallons**
of ethanol

and **4.2 million tons of**
dried distillers grains.

Valero Renewables Ethanol Plants

THE ALBERT CITY PLANT PRODUCES

The entire kernel of corn is turned into value-added products that we use every day.

The plant produces an environmentally friendly, high-octane **renewable fuel** that is blended with gasoline

Dried distillers grains with solubles (DDGS) and modified (or wet) distillers grains with solubles (MDGS), sold as high-value livestock feed for beef and dairy cattle, swine and poultry

Fuel- and feed-grade corn oil, for renewable diesel or biodiesel production, and livestock feed
