process more than

500 million bushels of corn
each year

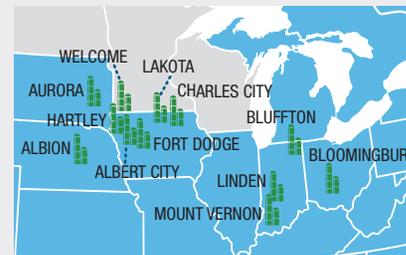

into **1.6 billion gallons**
of ethanol

and **4.2 million tons of**
dried distillers grains.

Valero Renewables Ethanol Plants

THE ALBION PLANT PRODUCES

The entire kernel of corn
is turned into value-added
products that we use
every day.

The plant produces an
environmentally friendly, high-
octane **renewable fuel** that is
blended with gasoline

**Dried distillers grains with
solubles (DDGS) and modified
(or wet) distillers grains
with solubles (MDGS)**, sold as
high-value livestock feed for
beef and dairy cattle, swine
and poultry

**Fuel- and feed-grade corn
oil**, for renewable diesel or
biodiesel production, and
livestock feed
