

VALERO RENEWABLES - ALBION

Valero's Albion ethanol plant is located on 107 acres near Albion, Nebraska, about 50 miles southwest of Norfolk. Valero acquired the plant from VeraSun Energy in April 2009.

PLANT FACTS

October 2007

Original startup

~65 full-time employees

Corn comes from **within 90 miles**

47 million bushels of corn processed per year

135 million gallons per year ethanol production capacity

355,000 tons per year dried distillers grains production

FLEET FACTS

14 ethanol plants process more than

600 million bushels of corn each year

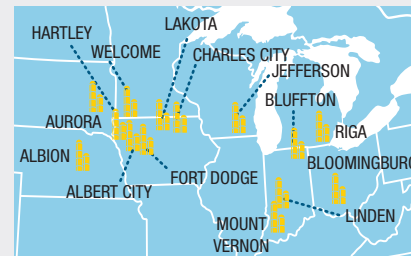

into **1.73 billion gallons of ethanol**

and **4.6 million tons of dried distillers grains.**

Valero Renewables Ethanol Plants

THE ALBION PLANT PRODUCES

Ethanol, an environmentally friendly, high-octane renewable fuel that is blended with gasoline

Dried distillers grains with solubles (DDGS) and modified (or wet) distillers grains with solubles (MDGS), sold as high-value livestock feed for beef and dairy cattle, swine and poultry

Fuel- and feed-grade corn oil, for renewable diesel or biodiesel production, and livestock feed

The entire kernel of corn is processed.
