263,000 tons per year
dried distillers grains
production

FLEET FACTS

12 ethanol plants
process more than

500 million bushels of corn
each year

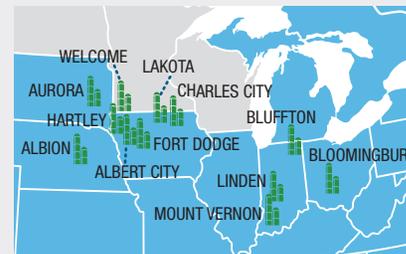

into 1.6 billion gallons
of ethanol

and 4.2 million tons of
dried distillers grains.

Valero Renewables Ethanol Plants

THE MOUNT VERNON PLANT PRODUCES

The entire kernel of corn is turned into value-added products that we use every day.

The plant produces an environmentally friendly, high-octane **renewable fuel** that is blended with gasoline

Dried distillers grains with solubles (DDGS) and modified (or wet) distillers grains with solubles (MDGS), sold as high-value livestock feed for beef and dairy cattle, swine and poultry

Fuel- and feed-grade corn oil, for renewable diesel or biodiesel production, and livestock feed
